

Package: vf (via r-universe)

September 17, 2026

Title Read Voter Files

Version 0.0.0.9000

Description States in the United States make full voter registries available as public information. This enables researchers to use voter files with clean, consistent formats. This package is focused on official voter files, rather than commercially available alternatives. Not all states are supported. The states which have readily available and free voter files are supported.

Index	5
-------	---

vf_read_fl	<i>Read FL voter file</i>
------------	---------------------------

Description

Read FL voter file

Usage

vf_read_fl(path_detail, path_history, widen_history = TRUE)

Arguments

- path_detail path to FL detail file or directory
- path_history path to FL history file or directory

Value

tibble

Examples

TODO

vf_read_nc	<i>Read NC voter file</i>
------------	---------------------------

Description

Read NC voter file

Usage

vf_read_nc(path_registration, path_history, ...)

Arguments

- path_registration path to NC registration file or directory
- path_history path to NC history file or directory
- ... additional arguments passed to readr::read_csv()

`vf_read_ny`

3

Value

tibble

Examples

TODO

<code>vf_read_ny</code>	<i>Read NY voter file</i>
-------------------------	---------------------------

Description

Read NY voter file

Usage

`vf_read_ny(path, ...)`

Arguments

`path` path to NY voter file
`...` additional arguments passed to `readr::read_csv()`

Value

tibble

Examples

TODO

<code>vf_read_oh</code>	<i>Read OH voter file</i>
-------------------------	---------------------------

Description

Read OH voter file

Usage

`vf_read_oh(path_registration, ...)`

Arguments

`path_registration` path to OH registration file or directory
`...` additional arguments passed to `readr::read_csv()`

Value

tibble

Examples

```
# TODO
```

vf_read_ok

Read OK voter file

Description

Read OK voter file

Usage

```
vf_read_ok(path_registration, ...)
```

Arguments

path_registration

path to OK registration file or directory

...

additional arguments passed to readr::read_csv()

Value

tibble

Examples

```
# TODO
```
